

Pitchboard

StupidGuy.com

Short Pitch:

- StupidGuy.com is the result of having no idea when creating the pre-production of a website with no actual idea processed.

Long Pitch:

- StupidGuy.com is a joke/ informational website detailing miscellaneous information on the self-proclaimed idiot Terence Bronaugh. The site being structured as a personal bio, should display that I have no actual idea what I want my final project to be and showcase how I am just typing out something entirely random so that I can turn assignments for my classes in on time. The website will probably also contain a lot of imagery, mostly memes.

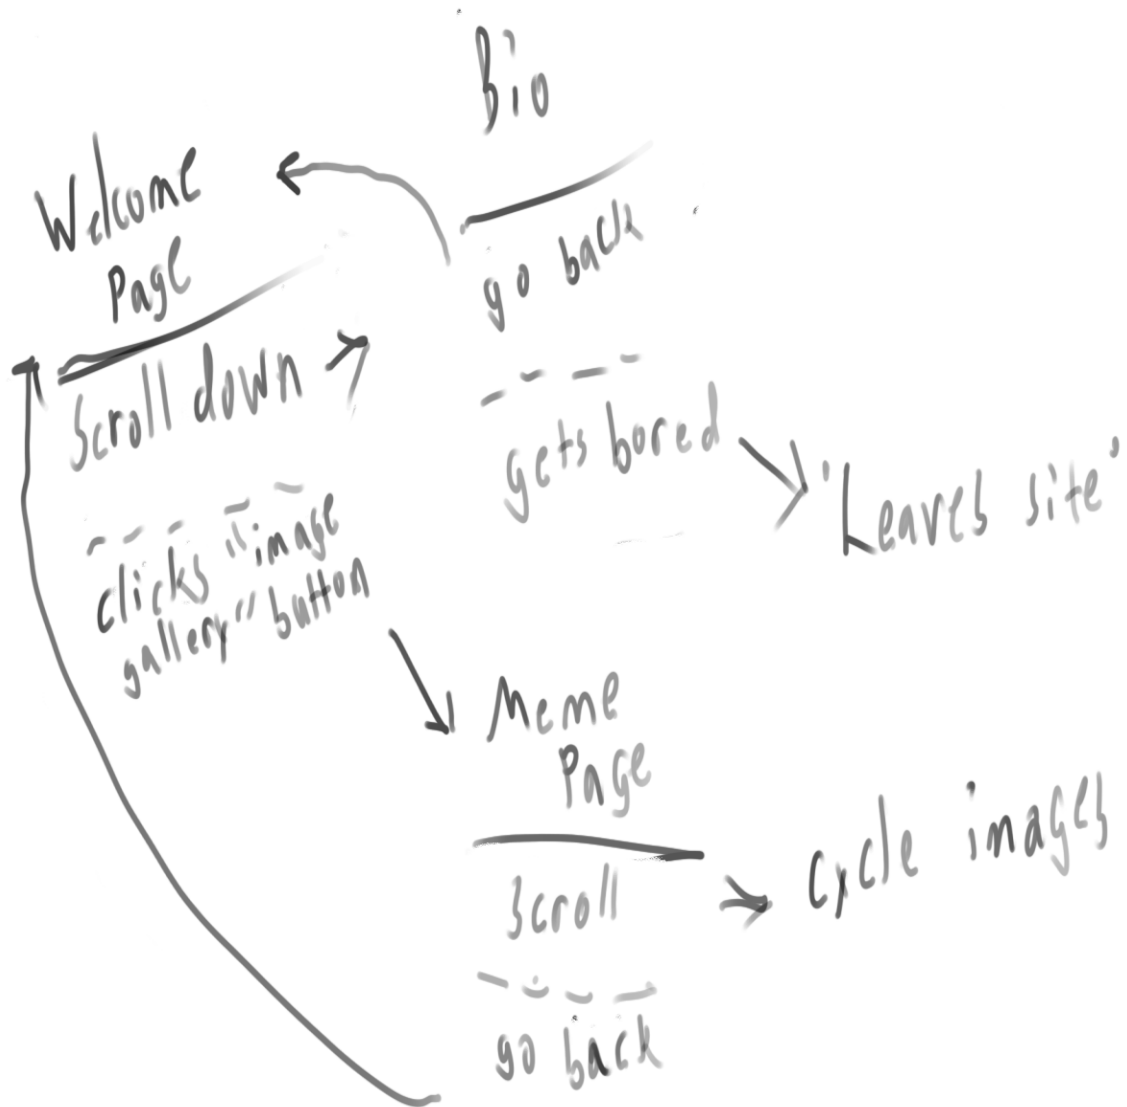

Personas:

- A (singular) Web Design & Development Teacher
- Miscellaneous Family Members
- Future Employers looking for reasons to fire me.

Comparatives (Design):

- Spotify Design (<https://spotify.design>)
- Wits Animation (<https://wits.agency/en#section0>)
